Hirad Hosseini

QBIO 490

Fall 2022

Github Homework

Activity:

1. You cd into your local directory and git pull.

4. No, there is a new file in the online directory.

7. If you want to git add, commit and push changes to the .txt file, you can safely do so only if the directory is your own copy. If everyone were to commit changes to the same directory, it would cause merge conflicts that could not be resolved.

Homework Check:

1. Git status
2. Git add -A; git add
3. Git commit -m "Message"
4. Git push
5. Git pull
6. Scp command
